

No Deportation — nowhere!

Unconditional right to stay for all people!

Monday, 18th February, 4:00 pm, Gänseliesel/Göttingen

The year 2019 is barely a month old and the federal government has already carried out four collective deportation flights to Gambia, Nigeria, Pakistan and Afghanistan in their way of violent and racist deportation practice. On February 18, another collective deportation to Afghanistan is planned.

We can not accept this!

We do not accept when politics dominated by racism plays with the lives of refugees and forcibly destroys their lives here in Germany! To enforce a racist refugee policy, the federal government is prepared to deport people to crisis and war zones where their lives are threatened:

They do not care that in Afghanistan in recent years, more people have been killed by war and terrorist attacks than ever before.

They do not care that even in Nigeria parts of the country are plagued by terrorist militias, armed conflicts and state repression.

They do not care that the German Foreign Office has issued travel warnings to its citizens for both Afghanistan and Nigeria.

We do not accept that the Göttinger Immigration Office deports refugees to countries that are hypocritically called "safe places". They put maximum pressure on them by extending their residence permits only for three days; by cutting their livelihood to a minimum; by not permitting to move in own rooms or start working. This creates deterrence, anxiety and insecurity.

We are protesting that day and want to send out a strong signal of solidarity against the deadly European migration policy and against inhumane deals between the EU and the dictatorial regimes that are upgrading the fortress Europe.

Our solidarity of civil-social initiatives stands against the policy of deportations and isolation and for equal rights and freedom of movement for all people.

Unconditional right to stay for all people!
